(54) Title: METAL COMPLEXES FOR USE IN OPTICAL RECORDING MEDIA

having high reflectivity as well as high sensitivity and good playback characteristics in the desired spectral range are made available.

(57) Abstract: The present invention relates to metal complexes of formula I, compositions comprising the metal complexes, to recording media comprising the metal complexes or compositions and to the use of the compositions in the production of optical recording media: wherein the substituent are as defined in the description. Use of the metal complexes of formula (I) in combination with oxonol dyes results, surprisingly, in a comparatively weak tendency of the oxonol dyes to aggregate in the solid state so that the absorption curve remains advantageously narrow even in the solid state, as a result of which recording media

INTERNATIONAL SEARCH REPORT

International application No.
PCT/EP2004/050706

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☒ Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
see FURTHER INFORMATION sheet PCT/ISA/210
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
1-10 (part)

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box II.2

Claims Nos.: -

Present claim 1 relates to an extremely large number of possible compounds. Support within the meaning of Article 6 PCT and disclosure within the meaning of Article 5 PCT is to be found, however, for only a very small proportion of the compounds claimed. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible.

Consequently, the the searchable subject-matter is

for the first identified invention

restricted on the subset of the compounds (I) as disclosed in claim 2, i.e. the compounds (IIa), (IIb), (IIc), (IId)

for the second identified invention

restricted on the subset of the compounds (I) as disclosed in claim 2, i.e. the compounds (III)

for the third identified invention

restricted on the subset of the compounds (I) as disclosed in claim 2, i.e. the compounds (IV)

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-10 (part)

Metal complexes of formula (IIa), (IIb), (IIc), (IId) compositions thereof, optical recording media comprising these compounds, use of (IIa), (IIb), (IIc) and (IId) in the production of optical recording media and a method of producing an optical recording medium involving (IIa), (IIb), (IIc) and (IId)

2. claims: 1-10 (part)

Metal complexes of formula (III), compositions thereof, optical recording media comprising (III), use of (III) in the production of optical recording media and a method of producing an optical recording medium involving (III)

3. claims: 1-10 (part)

Metal complexes of formula (IV), compositions thereof, optical recording media comprising (IV), use of (IV) in the production of optical recording media and a method of producing an optical recording medium involving (IV)
